KESQ2145xxSR is the new Khatod's family of optics for outdoor and indoor lighting applications.

Specifically designed for the most popular 3535 and 5050 package LEDs.

KESQ2145xxSR Lenses are square shaped with a 21.6 mm side and perform a variety of Circular Beam Angles from 15° to 35°.

KESQ2145xxSR has been developed to guarantee the highest on-axis intesity in long-distance aplications. On the other hand, even though KESQ2145xxSR provides a very narrow beam angle, it ensures a smooth light distribution in any indoor short-distance lighting application.

Made of optical SILICONE, these lenses work perfectly within -40° to +120°C temperature range.

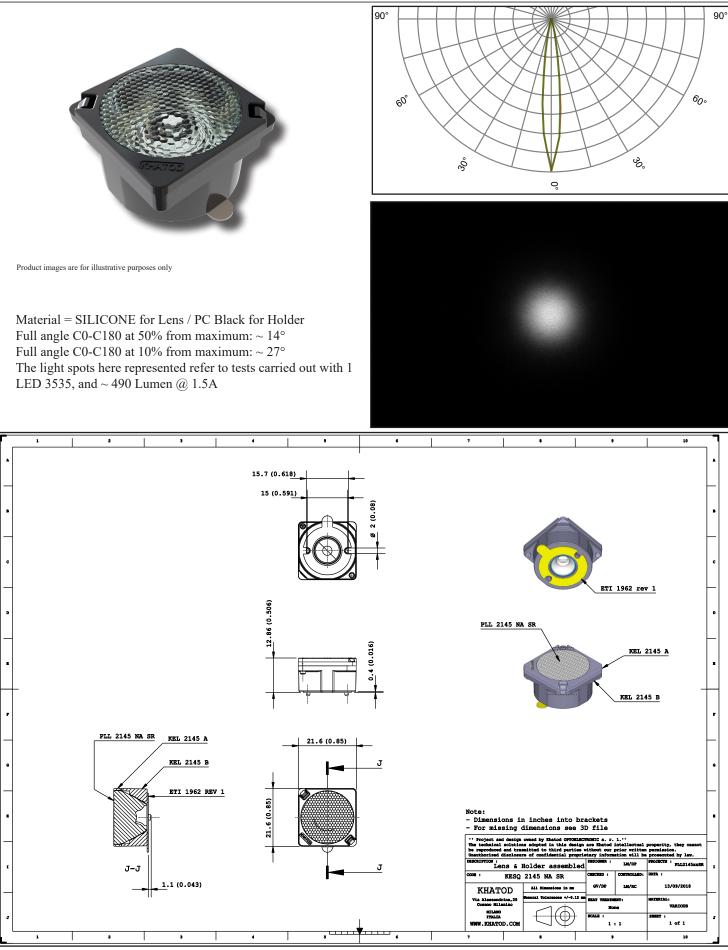

High lighting efficiency and excellent light distribution.

Can be used individually or configured in multiple parts so to create the perfect lighting fixture for your application, as linear lighting rows or in configurations of different shape and width.

The Lenses are easily assembled by Adhesive Tape fixing.

Assembly Specifications

Fixing Adhesive Tape Technical Drawing

Thermal shock resistance level

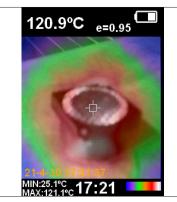

Initial Visual Inspection

Before starting the tests, a visual inspection was performed in order to check the integrity of the part. The part resulted physically intact. The reference temperature of the component under test is 120° C.

Temperature set in the climatic chamber

Temperature detected on the part by IR thermal camera

Final Visual Inspection

After testing, a final visual inspection was performed. The result was positive. (view photo)

Photo: the part in the climatic chamber after testing.

Based on the testing result, KESQ2145xxSR test specimens proved to overcome the thermal stress test up to 120°C, without any physical deterioration of the material.

Materials

Material	Тор	
SILICONE for the LENS	-30°150°C	
PC for the HOLDER	-30°120°C	
The Adhesive Tape datasheet is available at 3M website.		

Notes:

The optical values shown are the result of optical simulations carried out with LIGHTOOLS, ASAP and ZEMAX software systems. The optical simulations are carried out on the basis of the typical values provided in the LED manufacturers' official datasheets. The photometric analysis has been carried out on physical samples. On request, by supplying your PCB, we can provide the measurement photometric file.

Use and Maintenance

- DO NOT HANDLE OR INSTALL LENSES WITHOUT WEARING GLOVES, SKIN OILS MAY DAMAGE LENS OR LIGHT TRANSMISSION;
- CLEAN LENSES WITH MILD SOAP AND WATER AND A SOFT CLOTH;
- DO NOT USE ANY COMMERCIAL CLEANING SOLVENTS ON LENSES.

Disclaimer

Please note that flow lines and weld lines on the external surfaces of the lenses are acceptable if the optical performance of the lens is within the specifications.

Should you require further information, please contact Khatod for advice. All lens testing must be subject to identical conditions as Khatod test condition. Khatod Optoelectronic, Milan, Italy, manufactures lenses for LEDs. Any other use of the lens shall void our liability and warranty. The lenses are an inert component to be used in the manufacture of various products. Our warranty and liability are limited only to the manufacture of the lens. You may not modify, copy, distribute reproduce, license or alter the lens and related materials of Khatod. Khatod does not warrant against damages or defects arising out of the use or misuse of the products; against defects or damage arising from improper installation, or against defects in the product or in its components. No warranty of any kind, expressed or implied, is made regarding the safety of the products. The entire risk as to the quality or performance of the product is with the buyer.
