

SiO₃ Street Series

Ultra Clear Silicone Optic for High Brightness LEDs and COB LEDs.

The LEDs of latest generation - High Brightness LEDs and COB LEDs – achieve very high temperatures which could put strain on the conventional polymers such as PMMI, PMMA and PC.

The typical features of silicone make SiO₃ silicone lenses perfect for outdoor applications or indoor applications in damp and wet environments:

- High temperature resistant; considerably reduce the yellowing effect.
- NO need for extra protection: glass or gasket for IP.
- As an isotropic material, silicone provides SiO₃ silicone lenses with high flexibility allowing easy fit to the final application.
- As an elastomer, silicone provides SiO₃ silicone lenses with an excellent compensation capability that well meets the requirements of construction mechanical tolerances in the final application.

Notes:

- Intensity (I) and illuminance (E) data are normalized by 1000 lm
- The optical values shown are the result of optical simulations carried out with ASAP and ZEMAX software systems. The optical simulations are carried out on the basis of the typical values provided in the LED manufacturers' official datasheets. The photometric analysis has been carried out on physical samples. On request, by supplying your PCB, we can provide the measurement photometric file.
- General Optical Measurement Tolerance : $\pm 10\%$

Use and Maintenance

- DO NOT HANDLE OR INSTALL LENSES WITHOUT WEARING GLOVES, SKIN OILS MAY DAMAGE LENS OR LIGHT TRANSMISSION;
- CLEAN LENSES WITH MILD SOAP AND WATER AND A SOFT CLOTH;
- DO NOT USE ANY COMMERCIAL CLEANING SOLVENTS ON LENSES.
